 <p>ASH</p>	 <p>STRIPED MAPLE</p>	 <p>HEMLOCK</p>

BEECH

CLUE

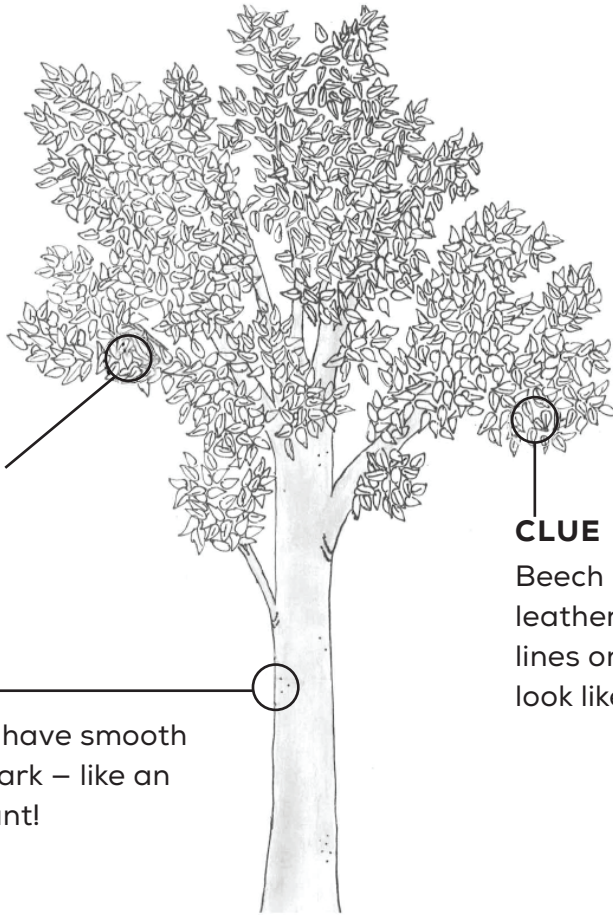

Beech nuts are as big as marbles and covered in a spiky shell.

CLUE

Beech have smooth gray bark – like an elephant!

CLUE

Beech leaves are leathery and have lines on them that look like fish bones.

BIRCH

CLUE

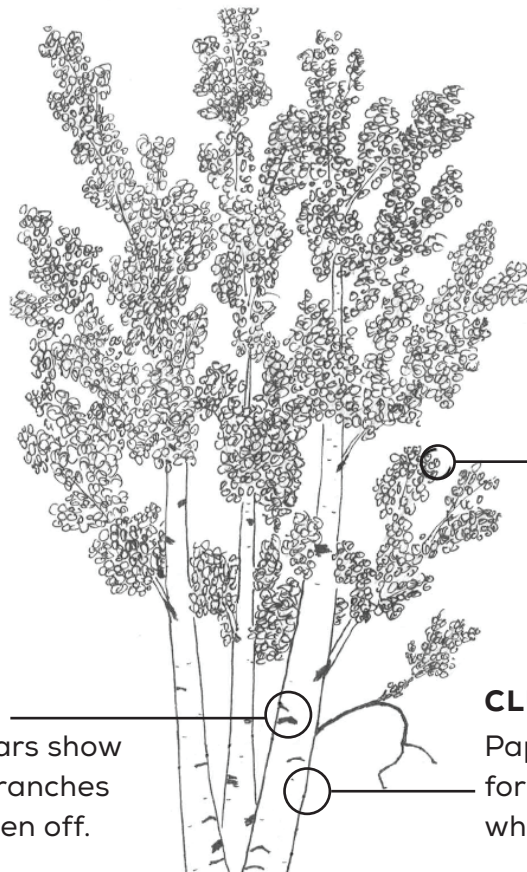

Black scars show where branches have fallen off.

CLUE

Birch leaves are small with saw tooth edges.

CLUE

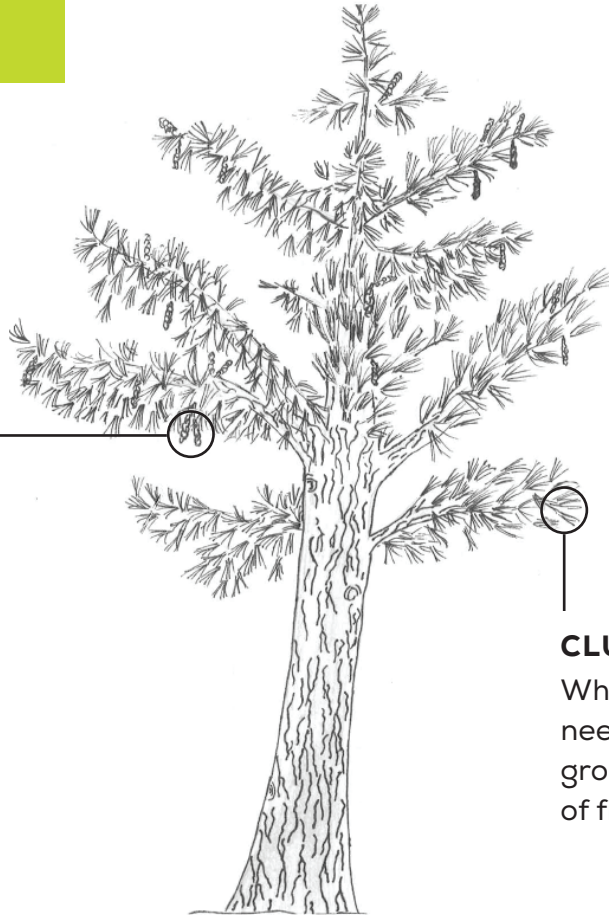

Paper Birch are famous for their peeling bright white bark.

WHITE PINE

CLUE

White Pine have pine cones that are long and have big open scales to cover its seeds.

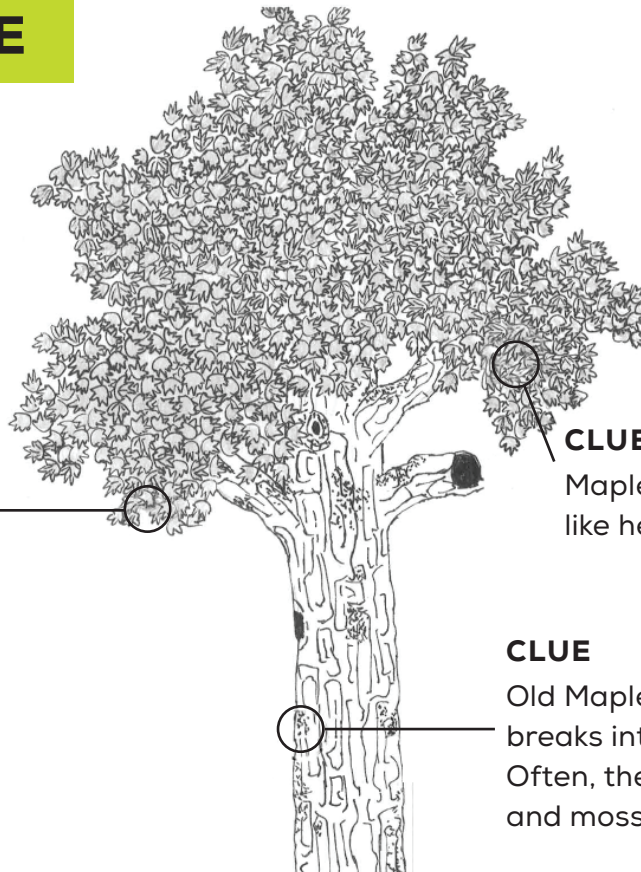

CLUE

White Pines have needles that are grouped in bundles of five.

SUGAR MAPLE

CLUE

Sugar Maples have leaves that look like your open hand.

CLUE

Maple seeds fly like helicopters.

CLUE

Old Maples have bark that breaks into big blocky pieces. Often, the bark has green lichen and moss growing on it.

OAK

CLUE

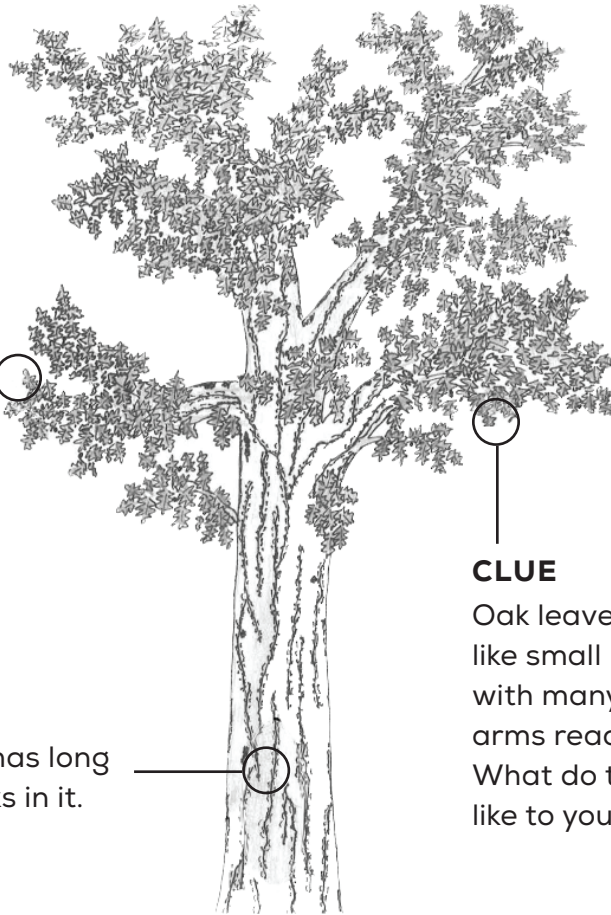

Acorns are the nuts of an oak tree. Look close and you can see that each acorn wears a "cap."

CLUE

Oak bark has long thick cracks in it.

CLUE

Oak leaves can look like small people with many sets of arms reaching out. What do they look like to you?

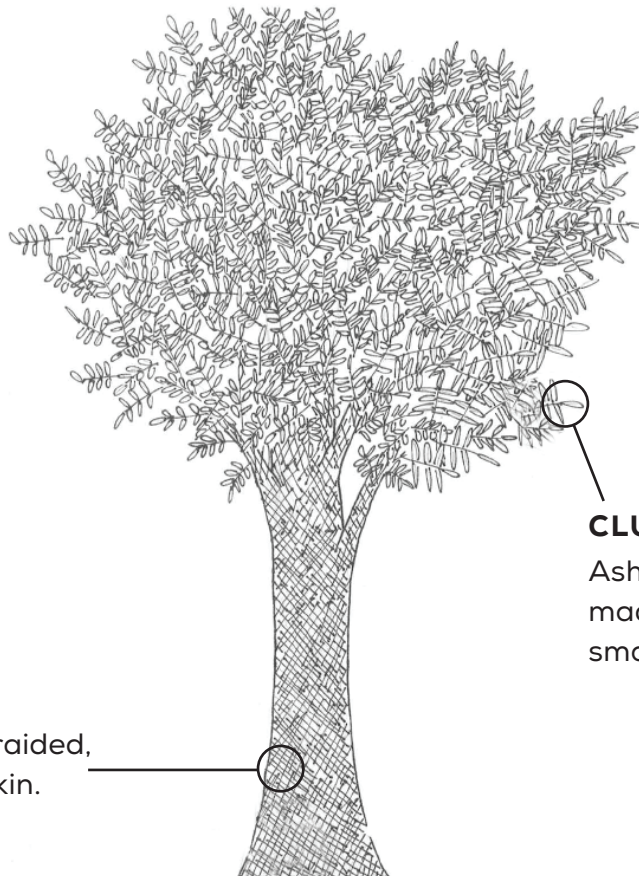

ASH

CLUE

Ash bark looks braided, like cantaloupe skin.

CLUE

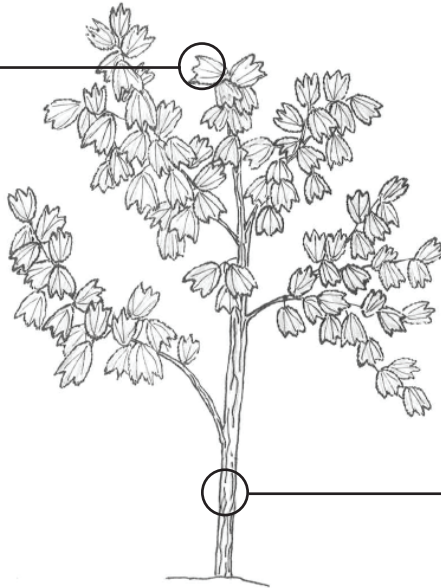

Ash leaves are made up of 5-9 small leaflets.

STRIPED MAPLE

CLUE

This little tree has great big three pointed leaves

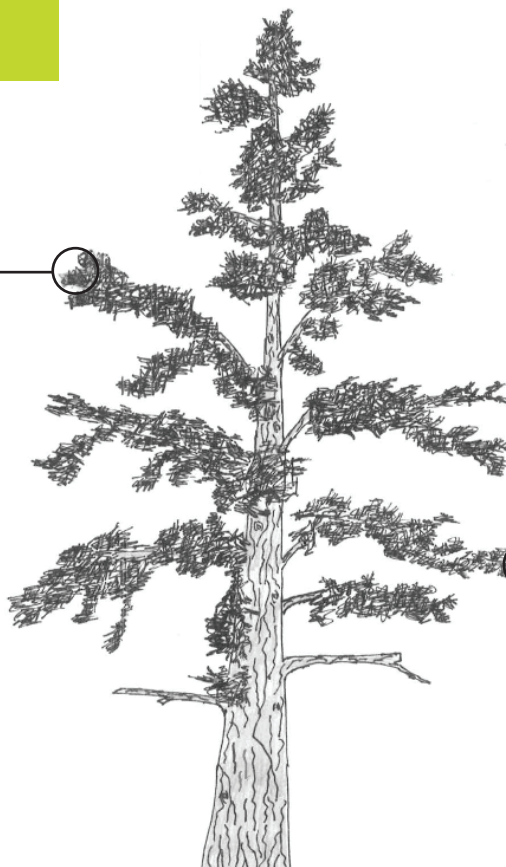

CLUE

Look on the bark for the green stripes that give the Striped Maple its name.

HEMLOCK

CLUE

Hemlock pine cones can be smaller than your thumbnail!

CLUE

Hemlock needles are flat, less than an inch long, and have soft rounded edges.
